PROFESSIONAL SUMMARY

Database Administrator with strong experience managing mission-critical production environments across diverse database technologies, including Oracle, SQL Server, and MongoDB. Highly skilled in implementing backup strategies, disaster recovery, performance tuning, and query optimization. Strong background in infrastructure and cloud automation, having designed architectures for cloud management applications. Proficient in Linux administration, monitoring utilities, and automating operational routines using Shell Scripting and Python.

SKILLS & COMPETENCIES

- MongoDB Architecture & Administration
- Database Backup, Restore & Disaster Recovery
- Security Best Practices & Access Control
- Oracle Cloud Infrastructure (OCI)
- Shell Scripting (Bash) & Python
- React, Fastify, Prisma & Next.js
- Oracle Database 19c/21c & Microsoft SQL Server
- Performance Tuning & Query Optimization
- Database Monitoring (Grafana, Zabbix)
- Linux Administration
- Docker & Containerization
- Scrum & Agile Methodologies

PROFESSIONAL EXPERIENCE

Database Administrator - In Forma Software

Jul 2024 - Present

- Administer and manage large, mission-critical production database environments, ensuring high availability.
- Implement and maintain robust backup, restore, and disaster recovery strategies.
- Perform advanced performance tuning and query optimization, analyzing execution plans.
- Enforce strict security best practices, access control, and user permission management.
- Troubleshoot complex production database incidents and support infrastructure teams.
- Automate database administration tasks and CI/CD routines using Python and Shell scripting.

Database Administrator & Data Analyst - Cod.ERP Tecnologia LTDA

May 2023 - May 2024

- Administered Microsoft SQL Server databases for enterprise ERP environments.
- Created and optimized complex SQL queries, database indexes, and analyzed performance metrics.
- Managed database security, backups, and provided technical support for large-scale enterprise environments.
- Processed and analyzed business data to support data-driven decision-making.

SAP ABAP Developer Intern - Karnekelje Logística

Jan 2022 - Mar 2023

- Developed SAP ABAP solutions and internal tables.
- Integrated SAP applications with relational databases.

PROJECTS & HIGHLIGHTS

CloudOps Hub - Server & Cloud Management

Designed the technical architecture for a robust server and cloud management web application, integrating real-time terminal environments.

Technologies: React, Fastify, Dockerize, Prisma, next.js, MongoDB

Cloud Infrastructure & Database Automation Lab

Built Cloud Infrastructure environments focused on database administration, Linux, monitoring, security best practices, and hands-on practice with MongoDB and relational DB backup/restore workflows.

Technologies: Cloud Infrastructure, MongoDB, Linux, Disaster Recovery, Backup & Restore

ByteData - Enterprise Data Integration Platform

Developed a corporate data integration platform to consume REST APIs, process JSON/XML payloads, and automate data ingestion workflows.

Technologies: Database Development, REST API, JSON/XML, Docker, Python

EDUCATION

Associate Degree in Systems Analysis and Development

Descomplica Digital College
Completed

Associate Degree in Systems Analysis and Development

UNINASSAU
Completed

Postgraduate Degree in Cloud Computing Projects

Descomplica Digital College

In Progress
