

JOSÉ VINÍCIUS LOURENÇO

Database Administrator | Cloud Infrastructure | MongoDB & Relational DBs

 vviniiciuslourengo@gmail.com  +55 81 99512-6839  Recife, PE, Brazil (Remote Available)  [LinkedIn](#)

 [GitHub](#)

PROFESSIONAL SUMMARY

Database Administrator with extensive experience managing mission-critical production environments across diverse database technologies, including Oracle, SQL Server, and MongoDB. Highly skilled in implementing automated backup strategies, disaster recovery (DR), performance tuning, query optimization, and execution plan analysis. Strong background in infrastructure and cloud automation, having designed architectures for multi-cloud management platforms. Proficient in Linux administration, monitoring utilities, and automating operational routines using Shell Scripting and Python.

SKILLS & COMPETENCIES

- | | |
|--|--|
| ► Databases: Oracle 19c/21c/ATP, SQL Server, MongoDB, MySQL | ► Administration: Backup & Restore, Disaster Recovery, High Availability |
| ► Optimization: Performance Tuning, Query Plans, Index Optimization | ► Cloud & Security: Oracle Cloud (OCI), Cloudflare Zero Trust, RBAC |
| ► DevOps & Infra: Linux SRE, Docker, Containerization, SSH2 | ► Automation: Shell Scripting (Bash), Python, CI/CD Routines |
| ► Observability: Database Monitoring (Grafana, Zabbix, Cloud Telemetry) | ► Full-Stack & Tools: React, Fastify, Prisma, xterm.js, Scrum / Agile |

PROFESSIONAL EXPERIENCE

Database Administrator — In Forma Software · Recife, PE, Brazil Jul 2024 – Present

- Administer and manage large, mission-critical production database environments, ensuring maximum uptime and high availability.
- Implement and maintain robust automated backup, restore, and disaster recovery (DR) strategies.
- Perform advanced performance tuning and query optimization, analyzing complex execution plans and resolving bottlenecks.
- Enforce strict database security best practices, access control, credential rotation, and user permission governance.
- Troubleshoot complex production database incidents in real time, supporting infrastructure and engineering teams.
- Automate database operational routines and CI/CD maintenance pipelines using Python and Shell scripting.

Database Administrator & Data Analyst — Cod.ERP Tecnologia LTDA · Recife, PE, Brazil May 2023 – May 2024

- Administered Microsoft SQL Server databases supporting high-throughput enterprise ERP environments.
- Created and optimized complex SQL queries, views, and database indexes, analyzing server performance metrics.
- Managed database security policies, regular backups, and provided L3 technical support for enterprise operations.
- Extracted, modeled, and analyzed corporate data to power executive reporting and business intelligence decisions.

SAP ABAP Developer Intern — KarneKeijo Logística · Recife, PE, Brazil Jan 2022 – Mar 2023

- Developed custom SAP ABAP enterprise solutions, reports, and internal tables.
- Integrated SAP software modules with relational databases ensuring transactional integrity.

PROJECTS & HIGHLIGHTS

CloudOps Hub — Self-Hosted Multi-Cloud DevOps Control Plane

React · Fastify · Dockerode · Prisma · xterm.js · MongoDB · OCI

Designed the complete technical architecture for an ultra-lightweight (<50 MB RAM) multi-cloud control plane. Features zero-agent SSH orchestration, real-time Docker container management, 24/7 autonomous watchdog with auto-healing and WhatsApp alerts, plus analytical telemetry persisted directly into Oracle Autonomous Database (ATP Always Free) via ORDS REST API.

Cloud Infrastructure & Database Automation Lab

Cloud Infrastructure · MongoDB · Linux SRE · Disaster Recovery · Backup/Restore

Engineered cloud environments dedicated to database administration, Linux automation, live monitoring, security hardening, and automated MongoDB / Relational DB failover workflows.

ByteData — Enterprise Data Integration Platform

REST API · Python · Docker · JSON/XML Processing · PostgreSQL

Developed a corporate data integration platform consuming external REST APIs, processing large JSON/XML data payloads, and orchestrating reliable automated ingestion pipelines.

EDUCATION

Postgraduate in Cloud Computing Projects

Descomplica Digital College · In Progress

Associate in Systems Analysis & Development

Descomplica Digital College · Completed

Associate in Systems Analysis & Development

UNINASSAU · Completed

CERTIFICATIONS & LANGUAGES

Certifications:

- Google IT Support Professional Certificate
- Microsoft Cloud & IT Fundamentals
- Oracle Cloud Infrastructure Foundations (In Progress)

Languages:

- Portuguese: Native
- English: Advanced (Professional Working Proficiency)
- Spanish: Basic
