

JOSÉ VINÍCIUS LOURENÇO

Database Administrator | Cloud Infrastructure | MongoDB & Relational DBs

winiciuslourengo@gmail.com • +55 81 99512-6839 • Recife, PE, Brazil (Remote Available) • [linkedin.com/in/jose-vinicius-lourengo](https://www.linkedin.com/in/jose-vinicius-lourengo) • github.com/ViniScooper

PROFESSIONAL SUMMARY

Results-driven Database Administrator with 5+ years of experience managing mission-critical production environments across enterprise relational and NoSQL engines, including Oracle, SQL Server, and MongoDB. Proven track record in orchestrating high-availability topologies, disaster recovery (DR) pipelines meeting strict RPO/RTO SLAs, execution plan analysis, index defragmentation, and query tuning that reduced I/O latency by up to 40%. Strong background in cloud automation, Linux administration, and SRE best practices, having architected multi-cloud control planes with zero-agent orchestration and automated operational routines using Shell Scripting and Python.

TECHNICAL SKILLS

Databases:	Oracle Database 19c/21c/ATP, Microsoft SQL Server, MongoDB Architecture, PostgreSQL, MySQL
DBA Core Competencies:	Backup & Restore Strategies, Disaster Recovery (RPO/RTO), Performance Tuning, Query Optimization, Execution Plans, Index Maintenance, ACID Compliance, Data Integrity, RBAC Security
Cloud & Infrastructure:	Oracle Cloud Infrastructure (OCI), AWS EC2/S3, Cloudflare Zero Trust Tunnels, Linux Server Administration (Ubuntu/CentOS), Docker & Containerization, SSH2 Zero-Agent Protocols
Automation & Dev:	Python, Shell Scripting (Bash), CI/CD Automation Routines, Fastify, React, Prisma, xterm.js, REST APIs
Monitoring & Tools:	Database Observability, Prometheus, Grafana, Zabbix, GitFlow, Scrum / Agile Methodologies

PROFESSIONAL EXPERIENCE

Database Administrator — In Forma Software Jul 2024 – Present | Recife, Brazil

- Administer enterprise production database clusters under high-load OLTP environments, maintaining 99.98% service availability SLAs across mission-critical software systems.
- Engineered automated transactional backup, restore, and Disaster Recovery (DR) pipelines, verifying data recoverability and achieving zero transactional data loss.
- Conducted advanced query optimization and index tuning via execution plan profiling, mitigating database locks and reducing average query response times by up to 35%.
- Enforced stringent database security standards, access control governance, credential rotation policies, and audited user permission schemas.
- Automated routine administrative database workflows and CI/CD verification routines using Python and Shell scripts, reducing manual operational interventions by over 50%.

Database Administrator & Data Analyst — Cod.ERP Tecnologia LTDA May 2023 – May 2024 | Recife, Brazil

- Administered Microsoft SQL Server enterprise databases supporting multi-tenant ERP operations and high-concurrency transactional processing.
- Authored and tuned complex SQL queries, stored procedures, triggers, and partitioned indexes to optimize resource consumption and eliminate CPU/IO bottlenecks.
- Supervised database integrity checks, automated differential backups, disaster mitigation plans, and provided L3 technical incident troubleshooting.
- Extracted and modeled corporate analytical datasets to fuel executive decision-making and cross-department business intelligence metrics.

SAP ABAP Developer Intern — KarneKeijo Logística Jan 2022 – Mar 2023 | Recife, Brazil

- Developed custom SAP ABAP modules, data dictionary structures, internal tables, and reports integrated with corporate relational backends.
- Streamlined business workflow logic and ensured data consistency across logistics database integration interfaces.

TECHNICAL PROJECTS & HIGHLIGHTS

CloudOps Hub — Self-Hosted Multi-Cloud DevOps Control Plane React, Fastify, Dockerode, Prisma, xterm.js, MongoDB, OCI

- Architected an ultra-lightweight (<50 MB host RAM footprint) multi-cloud control plane replacing heavy enterprise tools (Portainer, Datadog) for cost-free cloud execution.
- Integrated SSH2 zero-agent orchestration, live Docker streaming logs, and an autonomous 24/7 SRE Watchdog with active auto-healing and WhatsApp emergency alerting.
- Persisted time-series telemetry into Oracle Autonomous Database (ATP Always Free) via ORDS REST API with zero host memory overhead.

Cloud Infrastructure & Database Automation Lab Cloud Infra, MongoDB, Linux SRE, Disaster Recovery, Bash

- Engineered automated cloud testing labs focused on MongoDB and relational database failover topologies, disaster recovery validation, and automated shell-driven health checks.

ByteData — Enterprise Data Integration Platform Python, Docker, REST API, JSON/XML, PostgreSQL

- Developed a microservices-based integration platform consuming external REST APIs, transforming JSON/XML payloads, and managing automated ingestion pipelines.

EDUCATION, CERTIFICATIONS & LANGUAGES

Postgraduate in Cloud Computing Projects — Descomplica Digital College (In Progress)

Associate in Systems Analysis & Development — Descomplica Digital College (Completed)

Associate in Systems Analysis & Development — UNINASSAU (Completed)

Certifications: Google IT Support Professional • Microsoft Cloud & IT Fundamentals • Oracle Cloud Infrastructure Foundations (In Progress)

Languages: Portuguese (Native) • English (Advanced / Professional Working Proficiency) • Spanish (Basic)
